CRAIGVILLE EXCHANGE

GENERAL SERVICES

EXCHANGE LINE MILEAGE

I. CONDITIONS

- .1 Exchange Line Mileage (ELM) charges apply to all services, except rural primary exchange service, where facilities extend across the base rate area boundary into the rural or zoned area of the exchange.
- .2 When the base rate area is designated as or bounded by a street or road, the following treatment shall apply to customers on the far side of the street or road:

When general distribution facilities are located on the near side of the street or road, the customer is considered to be within the Base Rate Area if he can be reached with one drop pole and one span of wire (150 Ft).

When distribution facilities are located on the far side of the street or road the customer is considered to be within the Base Rate Area if he can be served by means of one span of wire (150Ft).

- .3 Mileage is measured airline in 1/4 mile units, smaller fractions being considered a whole unit.
  - .3.1 For each primary station on exchange service, between the customer's location and the nearest point on the nearest base rate boundary.
  - .3.2 For Private Line Services and Mileage Extensions.
    - a. In exchanges with one base rate area, the same measurement as in "3.1" immediately preceding.
    - b. In exchanges with more than one base rate area, if the facility extends beyond a second base rate area, the distance between the base rate areas plus the shortest distance between the location and the second base rate boundary.
    - c. If the facility extends between terminations in each of two base rate areas, in the same exchange, the shortest distance between the two boundaries.

MISCELLANEOUS SERVICES

1. CONDITIONS

- a. Custom Calling Services are furnished subject to the availability of facilities.

Custom Calling Services are available on business and residence one-party and key trunk exchange services. Custom Calling Services are not offered on public telephone service or semi-public service.

2. DESCRIPTION

Automatic Call Back – Allows a customer to activate automatic later placement of their call. When a busy signal is reached, the call is queued for up to 30 minutes and is automatically retried until both parties are available. The call is not automatically retried for periods longer than 30 minutes.

Automatic Recall – Allows a customer to automatically return the last incoming call by feature activation, whether or not it was answered. If the line is busy, the call is queued for up to 30 minutes or until both numbers are idle. The customer is given an indication that the network will attempt to set up the call when the line rings, then the other number rings.

Caller ID Only - Allows a subscriber to identify the telephone number associated with the incoming call, along with the date and time, to be displayed on the customer-provided display unit. Blocking the availability and activation are available at subscriber's option.

Caller ID Name and Number – Allows a subscriber to identify the name as well as the telephone number associated with the incoming call, along with the date and time, to be displayed on the customer-provided display unit. All other features are as available on Caller ID only.

Call Waiting – Allows a subscriber engaged in normal telephone conversation to be notified, by a tone signal, that a third party is trying to call. The subscriber may disconnect from the established call and answer the waiting call, or talk to the two parties alternately.

---

Effective

Officer: Lee VonGunten  
Title: Executive Vice President

Selective Call Acceptance – Allows a customer to select specific telephone numbers (maximum of 12) from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller the customer is not accepting calls.

Selective Call Rejection – Allows a customer to reject incoming calls from certain numbers (maximum of 12) known to the customer. The customer also can block incoming calls placed from the last calling number even if the number is unknown to the customer. Blocked calls are routed to a recorded announcement which specifies that the called party is not accepting calls.

Selective Call Forwarding – Allows a customer to prespecify telephone numbers (maximum of 12), from which calls are to be forwarded. During the period that selective call forwarding is activated, only calls from one of the prespecified numbers will be forwarded.

Call Forwarding – Permits a subscriber to forward all incoming calls to another telephone number. The customer is responsible for the payment of any long distance charges incurred in forwarding.

Busy Line Forwarding – Allows a subscriber to forward all incoming calls to another telephone number when the called telephone number is busy. The customer is responsible for the payment of any long distance charges incurred in forwarding.

No Answer Forwarding – Enables a subscriber to forward all incoming calls to another telephone number when the called telephone number is not answered by a specified number of rings. The customer is responsible for the payment of any long distance charges incurred in the forwarding.

---

Effective

Officer: Lee VonGunten

Title: Executive Vice President

Remote Call Forwarding – When the customer requests a telephone number that does not require a local loop, and this number is then permanently forwarded to another number.

Auxiliary Directory Number 1 – This service assigns a second directory number to the subscriber's telephone line. A specific ring pattern will identify the second number.

Auxiliary Directory Number 2 – This service assigns a third directory number to the subscriber's telephone line. A specific ring pattern will identify the third number.

Warm line – Help is not far away – even when you can't dial the phone. Your telephone can automatically dial an emergency number for you.

Three-Way Calling – Enables a subscriber to add a third party to an established call without the assistance of an operator. All long distance charges would apply when appropriate.

Call Transfer – Allows a customer to forward his/her calls to another number in the same exchange.

Speed Calling – Allows a subscriber to place a local or long distance call to a pre-determined telephone number by dialing an abbreviated code. This feature is available in thirty eight (38) number arrangements.

Section V

Sheet 7 (C)(original)

---

Anonymous Call Rejection – Allows a customer to refuse calls from callers who block their number.

Customer Originated Trace – Allows a customer to dial \*69 to obtain the number of the last call made to his/her number.

Voice Mail – Allows a customer to retrieve messages at any time from the customer's "voice mailbox".

Do Not Disturb – Allows a subscriber to prevent incoming calls from ringing the line by diverting them to an announcement.
